Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-21 and 24-25 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant claims “[a] liquid crystal display structure providing a moisture vapor transmission rate of less than about 4.6 gm/m²/day and an oxygen transmission rate of less than about 0.005 ml/m²/day.” Accordingly, the liquid crystal cell is the moisture barrier. As such, Applicant has fail to disclose how one of ordinary skill would make a liquid crystal cell which could be used as a moisture barrier structure with the recited rates. It appears that the specification discloses a specific moisture barrier layer attached the liquid crystal cell with the recited rates. However, when one includes the other layers of the cell, such as substrate, the liquid display structure would not provide the claimed rates. As the barrier layer would be the maximum rate, adding the substrates and liquid crystal layer would only decrease that rate.

Claims 5-6 remain rejected under section 112 first paragraph according to the rejected in paper no. 7.

Claims 1-21 and 24-25 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The additional limitation added to the claims is new matter as applicant did not describe the liquid crystal cell as barrier structure.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Response to Arguments

Applicant's arguments filed 9/16/02 have been fully considered but they are not persuasive. Applicant's argument on page 3 with respect to the 112.1 paragraph rejection is not persuasive. Applicant argument is essentially that the adhesive layer provides a protective coating but the claim recites the opposite, no protective coating.

Applicant still fails to enable how to make the polarizer that includes a cladding without a protective coating. Applicant claims "the front polarizer lacking a protective coating." Thus, the polarizer lacks a protective coating and at the same time the polarizer includes a cladding layer or adhesive. This cladding layer or adhesive is a protective coating. Accordingly, how would one of ordinary skill make a polarizer with a cladding layer or adhesive and at the same time the polarizer lacks a protective coating.

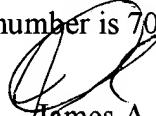

All other arguments are based on art, at this time, the art rejection has been dropped.
